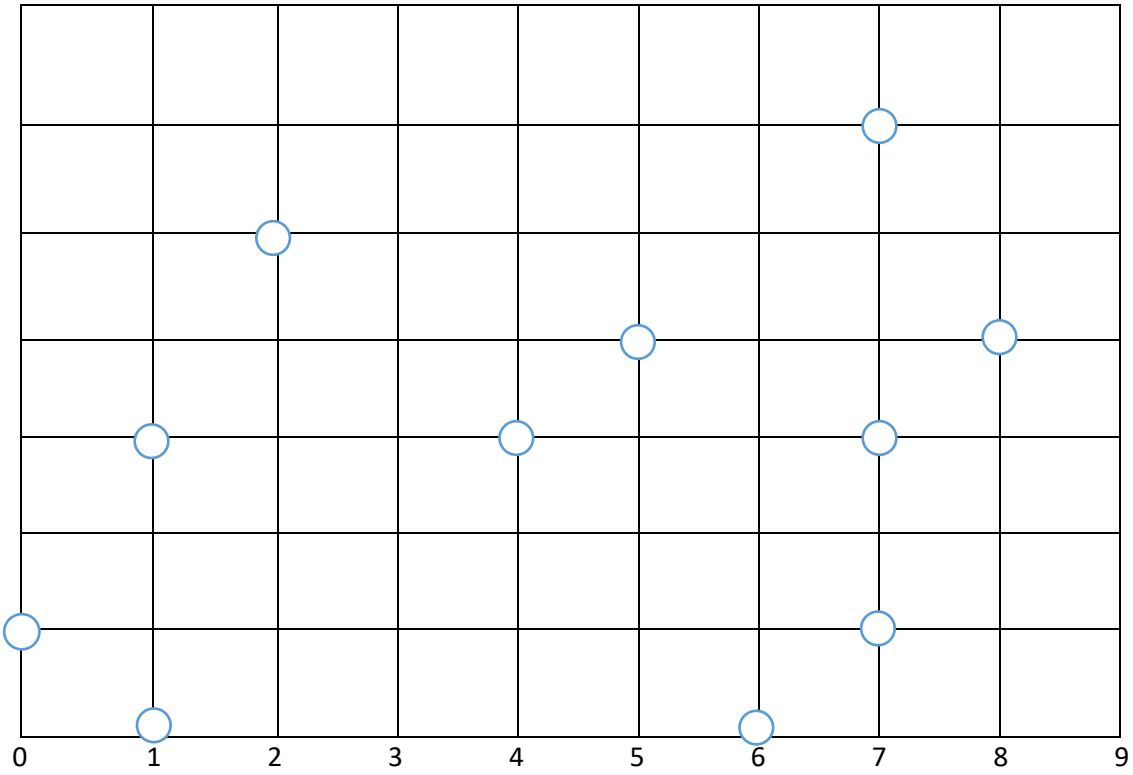
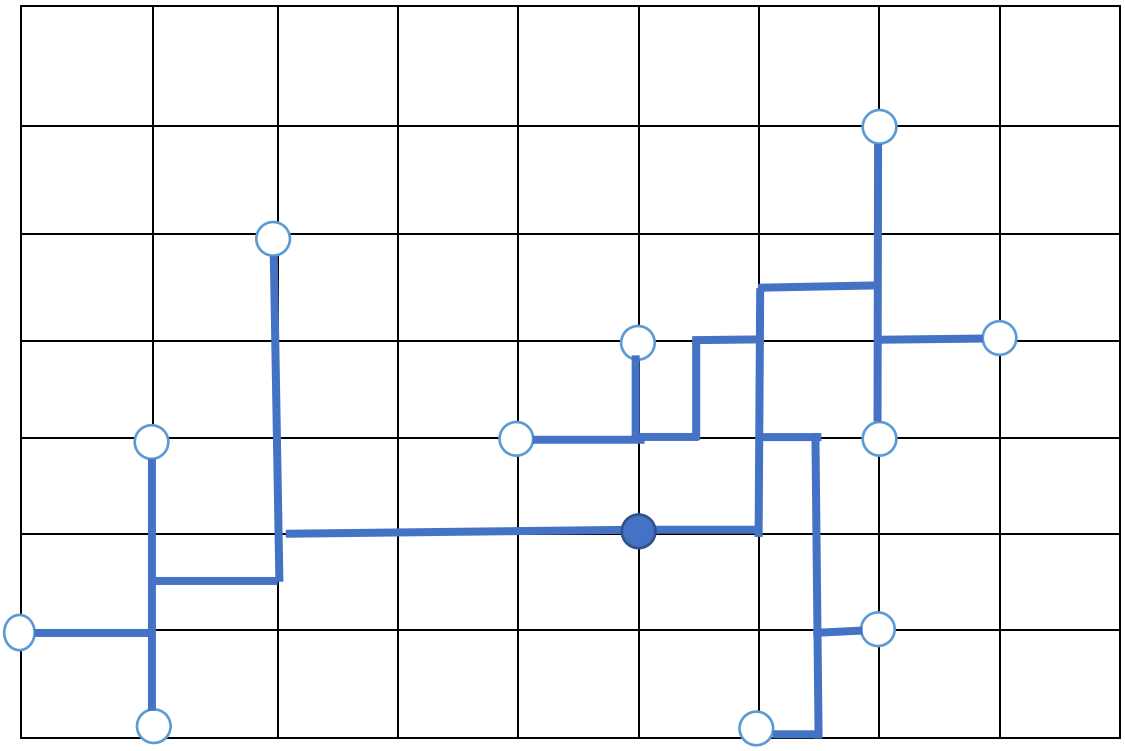
(1,0) (6,0), (0,1) (7,1), (1,3), (4,3), (7,3), (5,4), (8,4), (2,5), (7,6)

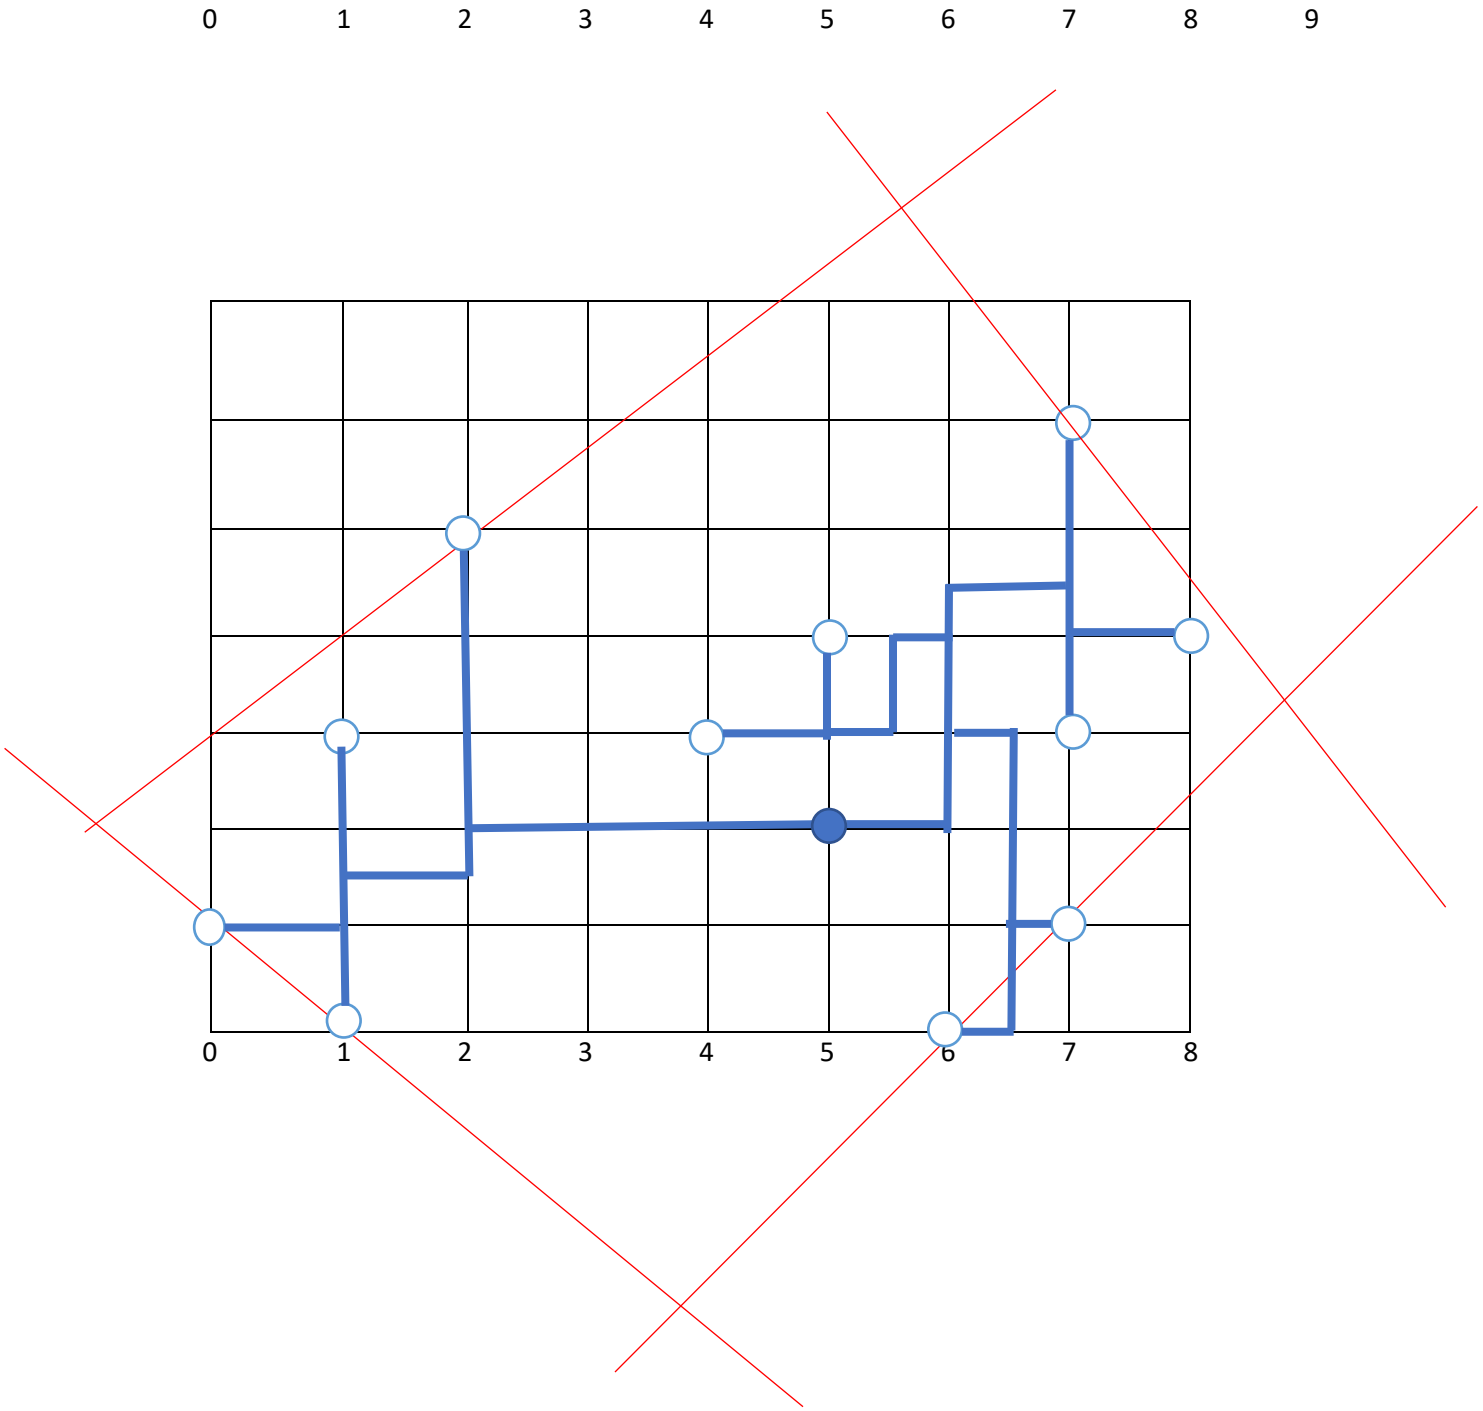
- Given points in Rectilinear Metric



- We have to find a point such that it is equidistant from all the terminals.



(1,0) (6,0), (0,1) (7,1), (1,3), (4,3), (7,3), (5,4), (8,4), (2,5), (7,6)



- The optimum Zero Skew Tree
  a) Length = 28.5
  b) Delay = 6
  c) Integral Lower Bound = 29
  d) Minimum Distance Lower Bound = 29
